

## QPAD®|MK95

Pro Gaming Mechanical Switchable switch Keyboard, with RGB backlit and Palmrest, Painting keycap, DE layout

The QPAD MK95 comes with the brand new switchable optical switch that combines two extremely different keystrokes feeling into one single optical switch. There are linear feeling and clicky feeling. That means you can choose what keystroke feeling and feedback you want or need, depending on what purpose you use the QPAD MK95. You have full control on your keyboard even the key switch and don't need to worry about what kind of switch is the better choice.

Due to the QPAD's special optical trigger design, the QPAD MK95 offer the lower-delay and more stable signal transmits by the special optical technology. That means the signal would almost synchronize reaction when you stroke the key.

The integrated "Anti-Ghosting" function enables you to simultaneously press all modifier buttons (i.e. Shift key, Ctrl button, Alt and Windows button) as well as 6 additional shortcut buttons, without losing or confusing any information (ghost button effect).

Furthermore we have equipped the QPAD MK95 with QPAD software which enables you to fully customize the RGB lighting, Macros and more function settings. This adds style to your skill and also ensures you never lose any command even in the darkest environment.

## QPAD®|MK95

### Pro Gaming Mechanical Switchable switch Keyboard, with RGB backlit and Palmrest, Painting keycap, DE layout

- The brand new QPAD MK95 switchable optical switch Keyboard combines two different keystroke feelings and feedback, Linear and Clickly. That provides you with two options depending on your purpose or Game. There is one switch on the right-top with light inductor for changing the key type, also shows you what kind of switch type you are using, red or blue. You just switch the pole to change all the key feeling in one second. Without doubt, high durability always is the main topic. The brand new QPAD MK95 switchable switch provides over 60million keystrokes.
- The volume roller offer the fast volume adjusting, just slide the roller to change the volume through one finger
- The special designed magnetic soft leather handrest offers more comfort for your wrists even in long battles and makes it easy to plug/unplug.
- The RGB lightning of the keyboard can be easily customized to gamers needs and preferences.
- The keyboard frame is built with aircraft level aluminum to provide a rock-solid protection for your weapon of choice.
